Re : Laboratory Operations Update

One of our laboratory staff tested positive for COVID-19 yesterday afternoon.

This person was last in the laboratory on Wednesday July 29th.

This person first felt symptoms Saturday August 1st in the evening.

Per IDPH/CDC guidelines, because it has been seven days since this person was last at the laboratory, there is no need for additional cleaning or disinfection of the facility.

The lab will continue its enhanced cleaning of the evidence intake area.

If anyone wants to postpone an evidence drop-off appointment, please contact the lab at clerical@nircl.org.

Out of respect for our laboratory staff member's privacy, please don't ask anyone for the identity of the person.

“Please remind your staff that masks are required to be worn covering the mouth and nose when entering the lab for any reason.”

If you have any questions, contact Phil Kinsey at pkinsey@nircl.org or (406) 493-8083.

Thank you and stay safe.
